

How to Update SSL on SuiteCRM

1. Upload New SSL Files

Place the following files in your SSL directory (e.g., /ssl/certs/):

Eg UAT path:

This PC > Local Disk (C:) > wamp > bin > apache > apache2.4.46 > conf > ssl				
Name	Date modified	Type	Size	
certificate.crt	05/07/2025 11:30 ...	Security Certificate	4 KB	
keyfile.key	05/07/2025 11:27 ...	KEY File	4 KB	

- SSL Certificate: certificate.crt

- Private Key: keyfile.key

2. Update Apache Configuration

Edit the VirtualHost file

Eg UAT path:

This PC > Local Disk (C:) > wamp > bin > apache > apache2.4.46 > conf > extra				
Name	Date modified	Type	Size	
httpd-autoindex.conf	08/02/2020 10:25 ...	CONF File	3 KB	
httpd-dav.conf	08/02/2020 10:25 ...	CONF File	2 KB	
httpd-default.conf	08/02/2020 10:25 ...	CONF File	3 KB	
httpd-info.conf	08/02/2020 10:25 ...	CONF File	2 KB	
httpd-languages.conf	08/02/2020 10:25 ...	CONF File	6 KB	
httpd-manual.conf	08/02/2020 10:25 ...	CONF File	2 KB	
httpd-mpm.conf	08/02/2020 10:25 ...	CONF File	5 KB	
httpd-multilang-errordoc.conf	08/02/2020 10:25 ...	CONF File	3 KB	
httpd-ssl.conf	05/07/2025 3:45 PM	CONF File	14 KB	
httpd-userdir.conf	08/02/2020 10:25 ...	CONF File	1 KB	
httpd-vhosts.conf	05/07/2025 3:45 PM	CONF File	1 KB	
proxy-html.conf	08/02/2020 10:25 ...	CONF File	4 KB	

<VirtualHost *:443>

ServerName crm.yourdomain.com

DocumentRoot /var/www/html/suitecrm

SSLEngine on

```
    SSLCertificateFile /ssl/certs/cert.crt
    SSLCertificateKeyFile /ssl/certs/ key.key
</VirtualHost>
```

3. Restart Wampp

- Click on the WAMP icon in the system tray.
- Select Restart All Services.
